

AEROMATIC<sup>™</sup> SERIES STANDARD RESIDENTIAL H95-TRG Heat Recovery Ventilator PRODUCT SPECIFICATIONS & TECHNICAL DATA

#### **PRODUCT DESCRIPTION**

Compact size, large performance – the H95-TRG heat recovery ventilator produces approximately **113 CFM** at 0.20 in.w.g (ESP) and recovers heat through its high-efficiency polypropylene core. The H95-TRG has been thoughtfully engineered for simple installation in apartments, condos, and small houses. The removable collars are top-mounted, which makes the unit both narrow and shallow enough to fit inside standard closets and other tight spaces.

The H95-TRG has two exclusive features. EvacMAX<sup>™</sup> provides on-demand boost for maximum ventilation. With FLEXControl, airflow circuits can be calibrated electronically, eliminating the need for resistance-inducing balancing dampers and improving overall efficiency.
